Brief introduction to the main business or products in the reporting period

The Company is a corporation incorporated in the People's Republic of China.

The Group engages in the development, manufacturing and commercialization of crop protection products, that are largely off-patent, and is one of the leading companies in the world in this field. The Group provides solutions to farmers in approximately 100 countries, through approximately 60 subsidiary companies throughout the world.

The Group's business model integrates end-customer access, regulatory expertise, global R&D and production capabilities, thereby providing the Group a significant competitive edge and allowing it to launch new and differentiated products that address farmers' needs in key markets.

The Group's primary operations are global, spanning activities in Europe, North America, Latin America, Asia-Pacific (including China) and India, the Middle-East and Africa. In aggregate, the Group sells its products in approximately 100 countries across the globe.

The Group is focused on the development, manufacturing and commercialization of largely off-patent crop protection products, which are generally herbicides, insecticides and fungicides, which protect agricultural and other crops against weeds, insects and disease, respectively. The Group also utilizes its expertise to adapt such products also for the development, manufacturing and commercialization of similar products for non-agricultural purposes (Consumer and Professional Solutions).

In addition, the Group leverages its core capabilities in the agricultural and chemical fields and operates in several other non-agricultural areas, none of which, individually, is material for the Group. These activities, collectively reported as Intermediates and Ingredients , include primarily, (a) the manufacturing and marketing of dietary supplements, food colors, texture and flavor enhancers, and food fortification ingredients; (b) fragrance products for the perfume, cosmetics, body care and detergents industries; (c) the manufacturing of industrial products and (d) other non-material activities.

Trends, events and key developments in the Group's macro-economic environment may have a material impact on its business results and development. The influence of these factors may differ depending on the geographic region and the different products of the Group. Since the Group maintains a wide product portfolio and since it is active in many geographic regions, the aggregate effect of these factors in any given year, and during the course thereof, is not uniform and may sometimes be mitigated by counterbalancing influences. The activities and results of the Group are further subject to, and affected by, certain global, localized and other factors, such as: demographic changes; economic growth and rising standards of living; agricultural commodity prices; significant fluctuations in raw material costs and global energy prices; development of new crop protection technologies; patent expiries and growth in volumes of off-patent products; the global agricultural markets and volatile weather conditions; regulatory changes; government policies; world ports, international monetary policies and the financial markets.

Syngenta Group

In January 2020, ChemChina and Sinochem (also a major economic conglomerate controlled by the Chinese Government, whose chairman, Mr. Frank Ning, also serves as the chairman of the ChemChina group) announced the formation of the Syngenta Group, a newly-formed ag-industry leader, registered in Shanghai and owned by ChemChina, being created through the bringing together of the agricultural businesses of ChemChina and Sinochem (the "Syngenta Group" - as defined above). Syngenta Group is expected to become one of the world's leading agriculture inputs companies, spanning crop protection, seeds, fertilizers, additional agricultural and digital technologies, as well as an advanced distribution network in China, reaching farmers nationwide.

Syngenta Group is expected to further bolster the coordination between the Syngenta Group's member companies, including the Company, and capitalize the value creation and business opportunities including by the Company. In this context, the Syngenta Group companies are exploring various initiatives to capitalize their synergies and have significantly advanced and strengthened their collaboration over the last year, generating meaningful additional revenue through, but not limited to, the potential provision of reciprocal access to certain products in specific territories, as well as exploiting opportunities aimed at optimizing the utilization of the companies' operational facilities benefiting from procurement and operational savings.

For further important additional information and details, please refer to the Annex to the Company's Announcement on the 2019 Full-Year Financial Preview dated March 31, 2020 (announcement no. 2020-19), (available at www.cninfo.com.cn).

3. Major accounting data and financial index

5. Corporate Bonds

Whether the company has corporate bonds that have been publicly issued and listed on the stock exchange, and not yet due or due but failed to pay as of the date of the approval of this Annual Report by the Board of Directors.

No.

II.Performance Discussion and Analysis

1. Business Operation summary in the reporting period

Whether the company needs to comply with the disclosure requirements of certain industry

No

Performance in Context of Market Environment

In 2019, the global crop protection market experienced challenging weather conditions in many regions, most notably flooding in North America and droughts in Southeast Asia and Australia, limiting crop protection application, delaying harvesting and reducing planted areas in key crops.

In Europe, channel inventories remained elevated, limiting sales into distribution and putting pressure on prices and margins.

The US-China trade tensions continued to affect global agricultural crop trading patterns, most notably with soybean growers in South America benefiting from a shift of Chinese import demand away from the US.

Despite these challenging market conditions, the Company delivered record sales in the fourth quarter and full year, compared with the same period as previously reported, driven by a combination of solid business growth as well as higher prices and the introduction of new and differentiated products, which have supported penetration and continued share gains in markets across the globe.

The Company continues to maintain cost discipline and raise prices wherever demand allows, mitigating to the extent possible the continued impact of shortages in certain raw materials and intermediates mostly owing to increased environmental focus in China. While some production capacity returned to the market in the second half of 2019, procurement costs remained generally elevated compared to the prior year.

Revenues. In the full year, the Company continued its strong performance, achieved despite the significant headwinds encountered throughout the year, including the impact of continued supply constraints, in particular RMB 1,410 million ($204 million) in missing sales of Jingzhou old site products, as well as challenging weather conditions in many regions.

Sales and Marketing expenses

Sales and marketing expenses for the full year of 2019 were slightly below the numbers presented at the time for the same period of 2018, largely reflecting the containment of expenses, lower logistics costs due to the Jingzhou old site disruption, and reduction from strengthening of the US Dollar, more than offsetting the inclusion of joiner's expenses, the amortization of the written-up value of assets transferred from Syngenta in connection with the 2017 ChemChina-Syngenta transaction as well as amortization of acquisition PPAs (see additional details below).

In recent years, the Company conducted various corporate development activities, including mergers and acquisitions, which resulted in the inclusion within its sales and marketing expenses of various one-time or non-cash or non-operational items affecting the Company's reported numbers, mainly as follows:

·Amortization of Legacy Purchase Price Allocation (PPA) of 2011 acquisition of Solutions (non-cash): Under PRC GAAP, since the first combined reporting for Q3 2017, the Company has inherited the historical "legacy" amortization charge that ChemChina was previously incurring in respect of its acquisition of Solutions in 2011. This amortization is performed in a linear manner on a quarterly basis, and will conclude by the end of 2020, resulting in the complete elimination of these charges from 2021 onward. Its reported financial impact in the full year of 2019 is RMB 262 million (USD 38 million), net of tax.

·Amortization of Transfer assets received and written-up due to 2017 ChemChina-Syngenta transaction (non-cash): The proceeds from the Divestment of crop protection products in connection with the approval by the EU Commission of the acquisition of Syngenta by ChemChina, net of taxes and transaction expenses, were paid to Syngenta in return for the transfer of a portfolio of products in Europe of similar nature and economic value. Since the products acquired from Syngenta were of the same nature and with the same net economic value as those divested, the Divestment and Transfer transactions had no net impact on the underlying economic performance of the Company. Its reported financial impact in the full year of 2019 is RMB 242 million (USD 35 million), this amortization is expected to be reduced to approximately RMB 209 million ($30 million), while in the year 2021 it is expected to further reduce to RMB 153 ($22 million).

·Amortization of acquisition-related PPA (non-cash): The amortization of non-cash intangible assets was created in the course of acquisitions, and has no impact on the ongoing performance of the companies acquired. Its reported financial impact in the full year of 2019 is RMB 47million (USD 7 million), net of tax.

General and Administrative expenses

The increase in general and administrative expenses is mainly the result of:

·the recording of Jingzhou old-site related idleness costs of RMB 276 million (USD 40 million) in the full year, as it advances its gradual ramp-up in production;

·a one-time provision in respect of employee severance costs and other related expenses of approximately RMB 243 million (USD 35 million) in the fourth quarter. These costs are related to the upgrade and relocation of the Company's production and environmental facilities at both the Jingzhou (Hubei Province) and Huai' An (Jiangsu Province) sites, which are reaching the final stage of relocation and upgrading, and will allow for a more skilled and smaller workforce;

Despite the above, the Company continued its strong containment of expenses, and managed to effectively reduce the balance of its general and administrative expenses, which also benefited from strengthening of the US Dollar.

Financial expenses

Financial Expenses alone mainly reflect interest payments on corporate bonds and bank loans as well as foreign exchange gains/losses on the bonds and other monetary assets and liabilities before the Company carries out any hedging. The impact of Financial Expenses (before hedging) is RMB 1,666 million (USD 242 million) for the full year of 2019 compared with RMB 570 million (USD 88 million) for 2018. The increase mostly reflects the negative impact of currency translations on balance sheet positions (before hedging), mainly due to the effect of the appreciation of the Israeli Shekel against the US Dollar on Solutions' debentures, as well as the higher interest expenses on a higher borrowing base.

Given the global nature of its operational activities and the composition of its assets and liabilities, the Company, in the ordinary course of its business, uses foreign currency derivatives (forwards and options) to hedge the cash flow risks associated with existing monetary assets and liabilities that may be affected by exchange rate fluctuations. Net gains/losses from hedging of those positions, are recorded in "Gains/Losses from Changes in Fair Value" , and are then transferred to "Investment Income" upon realization. The combined impact of Gains/Losses from Changes in Fair Value and Investment Income (excluding income from investment in associates and joint venture) is a net gain of RMB 574 million (USD 84 million) in 2019 compared with RMB -358 million (USD -53 million) in 2018.

The aggregate of Financial Expenses, Gains/Losses from Changes in Fair Value and Investment Income (hereinafter as "Total Net Financial Expenses and Investment Income"), which more comprehensively reflects the financial expenses of the Company in supporting its main business and protecting its monetary assets/liabilities, amounts to RMB 1,092 million (USD 158 million) in 2019 compared with RMB 928 million (USD 141 million) in 2018. Higher Total Net Financial Expenses and Investment Income over the full year reflect higher interest payment out of the higher borrowing base, the effect on balance sheet positions of a moderate weakening of the RMB in 2019 compared to its more marked weakening during 2018, as well as the impact of accounting changes related to IFRS 16 / ASBE 21, offset to some extent by the reduction in financing costs on the NIS-denominated, CPI-linked bonds due to a lower CPI in Israel.

For further important additional information and details, please refer to the Annex to the Company's Announcement on the 2019 Full-Year Financial Preview dated March 31, 2020 (announcement no. 2020-19), (available at www.cninfo.com.cn).

2. Material change in principal business during the reporting period

☐ Yes √No

√Applicable ☐Not applicable

The net profit belonged to holders of ordinary shares of the Company based on YoY changed significantly. For details, please see the 2019 Full-Year Financial Preview disclosed by the Company on March 31, 2020 (announcement number 2020-19).

6. Trading suspension and termination of the listing

☐ Applicable √ Not applicable

7. Matters regarding the financial report

(1) Explanation of the changes of the accounting policy, the accounting estimates and the accounting methods compared to the last financial report

√ Applicable ☐Not applicable

The changes of the accounting standards of the Group are as follows:

The Group began to adopt revised Accounting Standards for Business Enterprises 21 Leases ("ASBE 21"), promulgated by Ministry of Finance in 2018, from January 1, 2019.

Group prepare annual financial statements according to the Notice on Revising the Format of 2019 Financial Statements for General Enterprises (CaiKuai [2019] No.6, hereinafter "CaiKuai No.6") promulgated by Ministry of Finance on April 30, 2019. CaiKuai No.6 revised accounts in balance sheets, income statements, statements of cash flows and statements of changes in shareholders' equity, including:

- "Notes and accounts receivable" is split into "Notes receivable" and "Accounts receivable" ;
- "Notes and accounts payable" is split into "Notes payable" and "Accounts payable" ;
- Newly added "Receivables financing" and "Special reserve" ;
- Make clear or revise the contents presented within the accounts of "Other receivables" , "Non-current assets due within one year" , "Other payables" , "Deferred income" , "Other equity instruments" , "Research and Development expenses" ; "Interest income" and "Interest expenses" as subitems of "Finance expenses" , "Other income" , "Non-operating income" , "Non-operating expenses" , and "Capital injected by holders of other equity instruments" .
- Added disclosure requirements for provision of loss allowance, for loan commitments and financial guarantee contracts;
- Added "Gain from derecognition of financial assets at amortized cost" as a subitem of "Investment income" ;
- Adjusted the sequence of some items within the income statements;
- Make clear of the items in the cash flow statements, for the cash flows related to government grants.

The above modifications were retrospectively adjusted for comparative numbers. There is no significant impact to the Company's financial statements from implementation Caikuai No.6.

(2) Explain retrospective restatement due to correction of significant accounting errors in the reporting period

☐ Applicable √ Not applicable

No such cases in the reporting period.

(3) Explain change of the consolidation scope as compared with the financial reporting of last year

√Applicable ☐Not applicable

During the reporting period, the Group acquired Jiangsu Anpon Electrochemical co. LTD. through business combination under common control, Bonide Products INC., Agro Klinge S.A., and SFP through business combination not under common control.

ADAMA Ltd.

Legal Representative: Ignacio Dominguez

April 27, 2020

Section III - Significant Events

I.Changes in main accounting statement items and financial indicators in the Reporting Period, as well as reasons for the changes

√ Applicable ☐ Not applicable

During the first quarter of 2020, the global agrochemical market, amongst many others, was impacted by the unprecedented Coronavirus pandemic, COVID-19 (" COVID-19"). The pandemic, which started early in the quarter and now continues to rage throughout the rest of the world, has had a number of adverse effects on the Company's performance in the first quarter, compared to the corresponding period last year, the most significant of which were:

§ .In China, while operations at the Company's Huai' An, Jiangsu site have continued without material interruption, operations at the Jingzhou site in Hubei province were temporarily suspended from late January until the end of February due to the COVID-19 in the province. Although operations at the site recommenced at the beginning of March, restrictions on logistics remained, impacting the free transport of goods to and from the sites and to the ports;

§ .Renewed tightening in supply of raw materials and intermediates sourced from third parties in China and around the world;

§ .Restrictions on international trading and sales through the Company's global channels, as well as increased costs of global shipping, airfreight and other logistics;

§ .Lower demand in the Company's US Consumer & Professional (non-crop) businesses, as retailers slowed their restocking of products;

§ .Significant impacts on global currency markets, which have seen the rapid depreciation of many currencies against the US dollar, most notably the Brazilian Real, Australian dollar, Turkish Lira and Indian Rupee, as well as increased volatility in the Euro. These movements have negatively impacted the Company's performance in the first quarter compared to the corresponding period last year.

The ongoing spread of the pandemic is expected to continue to negatively impact the performance of the Company in the second quarter, and potentially beyond.

The Company is actively managing its response to the outbreak in order to ensure the safety of its employees and limit the impact on the Company's performance. Actions being taken include extending and strengthening distribution channels, use of expedited transport options where possible, working collaboratively with supply chain partners, and raising prices wherever possible to accommodate the weaker currencies and increased logistics costs.

Analysis of Financial Highlights

(1)Revenues

Revenues in the first quarter were $973 million, up 2% at constant exchange rates, with continued business growth in the face of the COVID-19 pandemic. Constant currency sales were constrained by an estimated $47 million due to COVID-19. In addition, sales were heavily impacted by the depreciation of global currencies, resulting in sales in US dollar terms being 3% below those of the same period last year.

The Company delivered solid business growth in Europe, driven by a strong performance in Eastern European countries, as well as throughout the India, Middle East & Africa region supported by favorable weather conditions in key areas. In Latin America, the Company was strengthened by its recent acquisition in Peru, but sales were impacted by the depreciation of regional currencies, most notably the Brazilian Real. Sales in North America were lower largely due to the impact of the COVID-19 on demand for the Company's Consumer & Professional products. In Asia-Pacific (excluding China), a strong performance in Australia, which has begun to see a recovery from the extreme drought conditions of the past few years, largely compensated for a COVID-19-driven slowdown in East-Asian markets and the depreciation of local currencies.

In China, despite seeing continued growth in the sales of the Company's branded, formulated products, overall sales in the country were impacted by lower sales of intermediates and unformulated products, mainly those produced at the Jingzhou site which was temporarily suspended during the quarter.

Regional Sales Performance

	Q1 2020 $m	Q1 2019 $m	Change USD
Europe	357	360	-1.0%
North America	168	180	-6.7%
Latin America	159	159	-0.3%
Asia Pacific	158	186	-14.9%
Of which China	68	94	-27.1%
India, Middle East & Africa	131	121	+8.3%
Total	973	1,006	-3.4%

Europe: Sales increased by 2.7% in the first quarter at constant exchange rates, compared with the corresponding period last year, driven by continued business growth, partially offset by lower prices resulting from high inventory levels in the industry's distribution channels.

In Northern Europe, the Company saw pleasing business growth in the quarter, partially recovering from supply constraints seen in 2019 that affected key products. The Company delivered robust growth in most Eastern European countries supported by favorable weather conditions, with noteworthy performances recorded in Russia and Ukraine, where the Company is seeing continued market share gains, as well as Hungary and Romania, which benefited from an early start to the 2020 season. In addition, the Company grew in the key western European markets of France and Italy.

In US dollar terms, sales in Europe were lower by 1.0% in the quarter, compared to the corresponding period last year, reflecting the net impact of weaker currencies, largely due to the COVID-19.

North America: Sales in the quarter were lower by 6.0%, at constant exchange rates, compared to the corresponding period last year, largely due to the impact of the COVID-19, which reduced demand for the Company's Consumer & Professional (non-crop) products.

The Company recorded strong business growth in Canada with solid demand for crop protection products, as well as favorable weather conditions. In the US, the Company obtained two new rice herbicide registrations in the quarter, enhancing its portfolio of solutions for conventional rice and complementing the Company's Preface ™ and Postscript ™ herbicides for the FullPage ™ Rice Cropping Solution, furthering the Company's offering to rice farmers.

In US dollar terms, sales in North America were lower by 6.7% in the quarter, compared to the corresponding period last year, reflecting the COVID-19-related weakening of the Canadian Dollar.

Latin America: Sales grew by 12.5% in the first quarter, at constant exchange rates, compared to the corresponding period last year. The robust performance was driven by strong business growth, bolstered by the Company's recent acquisition in Peru, alongside continued price increases.

The Company saw continued constant-currency business growth in Brazil in the quarter, despite drought conditions which delayed the planting season in key crops including soybean and reduced application of fungicides. Noteworthy performances were also recorded in the quarter in Mexico, benefiting from good weather conditions particularly in the Pacific region, as well as Colombia and Ecuador, driven by a good harvest season in key crops.

The Company continues to expand its differentiated product offering in the region with the launch during the quarter of EMINENT®, a dual mode broad-spectrum insecticide, in Argentina. The Company also obtained the registration of UBERTOP®, an insecticide used mainly for the control of a wide range of pests in tomato and cabbage, in Mexico.

In US dollar terms, sales in Latin America were lower by 0.3% in the quarter, compared to the corresponding period last year, reflecting the significant depreciation of regional currencies, most notably the
